## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 1 is objected to because of the following informalities: The recitation on lines 11-12 "the rear frame pivot points configured to pivotally attach the other suspension" seems awkward and incomplete. Suggest the phrase be changed to – the rear frame pivot points configured to pivotally attach to the other suspension --.

Also, the functional language of line 14 seems incomplete, specifically, the "short link wherein rotation."

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is (as best understood) rejected under 35 U.S.C. 102(b) as being anticipated by Takamiya et al. (5,370,411).

Takamiga discloses a bicycle frame with a rear suspension system, comprising:

a. A front frame section (2,3,4) including a seat tube (5) and a bottom bracket (1); the seat tube defining a pivot point (14) and said bottom bracket defining a second pivot point (12);

b. A short suspension link (13) including at least two suspension link pivot points (14,15), one of the at least two suspension link pivot points configured to pivotally attached to the pivot point on the seat tube,

a rear frame section (7) including at least two rear frame pivot points, one of said rear frame pivot points pivotally configured to attach to the pivot point at the bottom bracket and the other of the rear frame pivot points configured to pivotally attached to the other suspension link pivot points;

wherein positioning of each of said pivot points at the bottom bracket, the seat tube, and the short link would allow rotation of the rear frame section around the pivot point at the seat tube causes flexing of the rear frame section.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tseng ('593), Turner ('521), Bushby et al. ('456), Schonfeld ('550), Busby ('823), and Takagaki et al. ('929) are cited of interest.
